

Automobile Purge Control Valve Parts 290102B000 For Kia Soul 1.6L

Our Product Introduction

Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: 29010-2B000
- Minimum Order Quantity: 10 PCS
- Price: \$2.35 ~ \$3.45
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box , Standard tray
- Delivery Time: 3~30 work days
- Payment Terms: D/P, L/C, T/T
- Supply Ability: 10000 pcs per month

Product Specification

- Name: Vacuum Control Purge Valve
- Car Make: ELANTRA VELOSTER/ KIA SOUL
- Packing: Any Color Box As Customers' Requirement
- Quality: 100% Tested
- Guarantee: 24 Months
- Highlight: **Automobile Purge Control Valve ,
Purge Control Valve Parts , 290102B000**

Product Description

29010-2B000 Purge Control Valve 290102B000 For Kia Soul 1.6L 10-17 Hyundai I20 I30 12-15 Elantra K3 Creta Cerato 2006

Product Description:

The Vacuum Control Purge Valve, also known as the EVAP (Evaporative Emission Control) Purge Valve, is an essential component of a vehicle's evaporative emission system. It plays a crucial role in controlling and purging fuel vapors from the fuel tank, preventing them from escaping into the atmosphere. Engineered for optimal performance and environmental compliance, our purge valve ensures effective vapor management and prevents harmful emissions.

Features:

- 1. Precise Vapor Control:** Our vacuum control purge valve provides precise control over the flow of fuel vapors from the fuel tank to the engine intake manifold. It opens and closes in response to signals from the vehicle's engine control unit (ECU), ensuring proper vapor purging and preventing the release of harmful emissions into the environment.
- 2. Efficient Evaporative Emission System Operation:** By effectively managing fuel vapors, our purge valve contributes to the efficient operation of the evaporative emission system. It helps maintain the integrity of the system, preventing fuel vapor leaks and ensuring compliance with emission regulations.
- 3. Vacuum-Assisted Purging:** Our purge valve utilizes the engine's vacuum to create the necessary suction for drawing fuel vapors from the fuel tank. This vacuum-assisted purging process allows for efficient and consistent removal of fuel vapors, optimizing the performance of the evaporative emission system.
- 4. Durable Construction:** Our purge valve is built to withstand the demanding conditions of the engine compartment. It features a robust housing and high-quality internal components, ensuring durability, resistance to corrosion, and reliable performance even in harsh operating environments.
- 5. Direct Fit Replacement:** Our vacuum control purge valve is designed as a direct fit replacement for your original equipment. It is specifically engineered to match the specifications and mounting points of your vehicle's make, model, and engine, ensuring a seamless installation process.

FAQ:

1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specilizing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts,electric parts, steering parts,transmission parts, body parts. . .

2. How can we guarantee quality?

Always a pre-production sample before mass production;
Always final inspection before shipment.

3. Why should you buy from us from other suppliers?

We have experience in spare parts for more than 10+years
A large of stock
Professional export company
Accept small order
We can design anything well according to customers' requirment
