

25380-1F252 Hyundai Cooling Radiator Fan for Automobile Spare Parts 25380 1F252

Our Product Introduction

For more products please visit us on automobile-sparepart.com

Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: 25380-1F252
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box , Standard tray
- Delivery Time: 3-35 days
- Payment Terms: D/P, L/C, T/T

Product Specification

- Name: Automobile Spare Parts
- Type: Cooling Radiator Fan
- Size: Standard
- Car Make: For Hyundai
- Country Of Origin: China
- Warranty: 12 Months

Product Description

Product Description:

Welcome to our cutting-edge Cooling Radiator Fan that is specifically engineered to deliver efficient and dependable cooling for your automobile's radiator. Our fan is designed to enhance the airflow across the radiator, ensuring top-notch cooling performance and preventing the engine from overheating.

The Cooling Radiator Fan serves a vital function as it contributes to improving the airflow across the radiator. By pulling ambient air through the radiator core, the fan helps in dissipating heat from the coolant effectively. The fan works especially well in situations where the vehicle is stationary or the airflow generated by the vehicle's movement is not enough to cool the radiator adequately.

Features:

Enhanced Cooling Performance:

Our Cooling Radiator Fan is specifically designed to maximize the airflow across the radiator, which effectively dissipates heat and keeps the engine at an ideal operating temperature. During low-speed driving or when the vehicle is stationary, this fan improves the cooling efficiency that ensures consistent and reliable engine performance.

Electric Fan Technology:

Compared to the traditional mechanical (belt-driven) fans, our fan utilizes electric motor technology, providing various advantages. For instance, it allows precise control over cooling requirements, adjustable speeds based on engine temperature, and reduce the load on the engine that may result in potential fuel savings.

High-Quality Construction:

Our Cooling Radiator Fan is built to withstand daily use. Its durable motor and fan assembly provide reliable and long-lasting performance. The fan blades are designed with careful balance for smooth operation and efficient airflow.

Quiet and Efficient Operation:

Our Cooling Radiator Fan is engineered for quiet operation, reducing noise and vibration. It operates efficiently, ensuring the necessary airflow with minimal energy consumption.

Quality Assurance:

We have strict quality control processes to ensure the reliability and performance of our Cooling Radiator Fans. Each fan undergoes rigorous testing to ensure optimal cooling efficiency, durability, and long-term reliability.

Technical Parameters:

Product Attribute	Value
Name	Automobile Spare Parts
Type	Cooling Radiator Fan
Size	Standard
Country of Origin	China
Car Make	For Hyundai
Warranty	12 Months

Applications:

Looking to improve your vehicle's cooling system? Look no further than our high-performance Cooling Radiator Fan. Our product offers a number of benefits, including enhanced cooling efficiency, reliable engine temperature management, and improved overall performance. Don't risk an overheated engine. Our Cooling Radiator Fan is built to withstand even the toughest conditions, so you can trust in its durability and functionality. This fan is designed to keep your engine running smoothly and protect it from the risks of overheating, ensuring it remains in top condition for years to come.

Upgrade your vehicle's cooling system today – choose our Cooling Radiator Fan for enhanced performance and peace of mind.

Upgrade your vehicle's cooling system with our high-performance Cooling Radiator Fan.

Experience enhanced cooling efficiency, reliable engine temperature management, and improved overall performance. Trust in the durability and functionality of our Cooling Radiator Fan to keep your engine running smoothly and to protect it from the risks of overheating.
